

## **Strategic Planning Work Team #4 – Traditional Undergraduate Students – April 28, 2011**

**Members:** Maria Kohnke, Angela Naginey, Heidi Granger, Susan Murphy, Druanne Pagliosotti Chris Paul and Bill Rosser Joan Griffin Regrets: Wyant Morton, Jenny Charret

We need to start to pull the information together and to synthesize the information we have received from

Should we be a recommending body on: selectivity, faculty to student ratio, growth rates, diversity, etc... Some general recommendation of things could be considered into the plan.

We have all received copies of the notes/minutes from the discussion around campus regarding our questions that we drafted as a committee.

Before moving forward we need to determine what area needs support services now before we grow too much. We need for the support services to catch up with our reality now.

We discussed the goal numbers and what is currently on list for support services and staff that are being requested.

If we continue to grow, we need to keep the feel of that campus the way we are. What do we need to support the growth we have? The key items should be identified and analyzed.

The major thing, a: catch up with who we are; more systematic way to grow to implement a system to campus wide to determine what triggers should exist to implement new staff.

We need to recommend ideas, but also make sure that we include in the recommendations what makes us unique as a campus. (Residential, small class sizes, ...)

The number of adjuncts might be another trigger. Our growth has disproportionately affected some areas more than others.

We need a way to identify what

A recommendation to suggest for ways to help students figure out how majors lead to careers. What are some innovative ways to market the path to job/career?

Path from major to career. Ways to help students think through this.

Should we still require students to pay for the STAR Program?

If we dreamed on Retention we could maybe implement a tutoring center, supplemental instruction. Explore models...

Put the minutes into buckets for the questions.

Get ready for professional development day, just put together a .ppt for PD Day.

Look at a meeting for Tuesday, the 10<sup>th</sup> at 1:00pm
